

# INTERACTIVE NOTEBOOK

## TEMPLATE AND EXAMPLE:

Students put riddle on front and draw image under the flap.

*(Or students can use*

*Template and sample riddles on next page.*

*Read a few of the included examples of the riddles before having students complete their own.*

# SUGGESTED USE FOR INTERACTIVE NOTEBOOK TEMPLATE AND SAMPLE RIDDLES TO READ TO STUDENTS

The template for riddles can be used in a variety of ways in order to differentiate for all students. Students can print riddles on the outside with the picture answer inside, or they can use the clipart for the inside and describing words on the outside or the habitat on the inside and the animal on the out which wouldn't require any words. Prior to having students do the interactive notebook riddles, here are a few to read to stimulate thought.

1. I have 8 fuzzy legs. I live where there is lots of rain. I live on the ground. I eat insects and grasshoppers and sometimes lizards and frogs.  
***Where might I live and what might I be? Rainforest - Spider—tarantula.***
2. I buzz and make honey. I help plants because I pollinate flowers.  
***Where might I live and what might I be? A bee—Forest***
3. People that live in my habitat will need to dress very warmly. I only have two seasons and the animals that live here include penguins, polar bears and seals.  
***What habitat am I? Polar***
4. I have feathers and I quack. I find my food and shelter in water.  
***Where might I live and what might I be? A duck in the Wetland.***
5. I have feathers and I like to eat other smaller birds and rodents. I am not near many trees but there is lots of grass where I find my food.  
***Where might I live and what might I be? Grassland—Hawk***
6. I am the largest animal on earth but I live in the water! I love eating fish and krill and like to migrate to warmer waters in the winter.  
***Where might I live and what might I be? Whale (Blue) and the Ocean.***
7. I am home to lots of sand, there aren't many plants here, but I do have cactus and lots of insects. Camels do well here because they can store water and there isn't much water here.  
***What habitat am I? The Desert***
