

Name: _____

Be a Math Wizard!

Use less than <

Greater than >

Or equal =

to compare the 2 fractions. (Example: $1/2 < 3/4$) or $1/2 = 2/4$)

Compare the fractions.

1. $\frac{6}{8}$ $\frac{3}{5}$

2. $\frac{3}{5}$ $\frac{1}{3}$

3. $\frac{6}{8}$ $\frac{2}{5}$

4. $\frac{3}{4}$ $\frac{1}{4}$

5. $\frac{3}{4}$ $\frac{3}{5}$

6. $\frac{3}{5}$ $\frac{2}{3}$

7. $\frac{3}{5}$ $\frac{1}{4}$

8. $\frac{2}{5}$ $\frac{2}{5}$

9. $\frac{1}{8}$ $\frac{1}{8}$

10. $\frac{5}{8}$ $\frac{6}{8}$

11. $\frac{4}{6}$ $\frac{4}{5}$

12. $\frac{3}{5}$ $\frac{3}{6}$

13. $\frac{3}{6}$ $\frac{3}{5}$

14. $\frac{7}{8}$ $\frac{3}{6}$

15. $\frac{2}{4}$ $\frac{1}{3}$

16. $\frac{2}{5}$ $\frac{1}{4}$

17. $\frac{1}{3}$ $\frac{2}{3}$

18. $\frac{2}{4}$ $\frac{1}{5}$

19. $\frac{1}{4}$ $\frac{2}{3}$

20. $\frac{2}{3}$ $\frac{3}{5}$

Try using fraction circles or bars to determine the size of the fractions.

Name: _____

Be a Math Wizard!

Use less than <

Greater than >

Or equal =

to compare the 2 fractions. (Example: $1/2 < 3/4$) or $1/2 = 2/4$)

Compare the fractions.

1. $\frac{6}{8} > \frac{3}{5}$

2. $\frac{3}{5} > \frac{1}{3}$

3. $\frac{6}{8} > \frac{2}{5}$

4. $\frac{3}{4} > \frac{1}{4}$

5. $\frac{3}{4} > \frac{3}{5}$

6. $\frac{3}{5} < \frac{2}{3}$

7. $\frac{3}{5} > \frac{1}{4}$

8. $\frac{2}{5} = \frac{2}{5}$

9. $\frac{1}{8} = \frac{1}{8}$

10. $\frac{5}{8} < \frac{6}{8}$

11. $\frac{4}{6} < \frac{4}{5}$

12. $\frac{3}{5} > \frac{3}{6}$

13. $\frac{3}{6} < \frac{3}{5}$

14. $\frac{7}{8} > \frac{3}{6}$

15. $\frac{2}{4} > \frac{1}{3}$

16. $\frac{2}{5} > \frac{1}{4}$

17. $\frac{1}{3} < \frac{2}{3}$

18. $\frac{2}{4} > \frac{1}{5}$

19. $\frac{1}{4} < \frac{2}{3}$

20. $\frac{2}{3} > \frac{3}{5}$

Try using fraction circles or bars to determine the size of the fractions.
