## Answers

Did you know that a person can live without food for more than a whole month? A person can only live for about one week without water. We need water more than we need food.

Did you know that 97 % of earth's water is in the oceans? Just 3 % of the earth's water can be used for drinking water. 75 % of the world's fresh water is frozen in the north and south polar ice caps.

Water can be found on the earth's surface both in the ground and in the air.

Water can be found in three different forms: liquid, gas, and solid.

There is the same amount of water on earth as there was when the earth was formed. The water that came from your own faucet could contain molecules that the dinosaurs drank.
