

Name _____

The Digestive Organs

Look at the description, then draw an arrow to the correct organ.

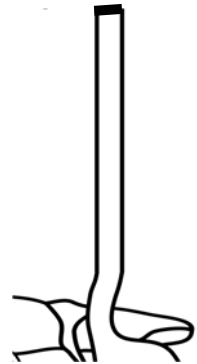

I am the large intestine and I help to remove the solid waste to be excreted.

I am the esophagus and I bring the food from the mouth to the stomach.

I am the liver, I add digestive fluids to help break down the food.

I am the stomach and the food travels to me after leaving the esophagus.

I am the small intestine and I absorb the nutrients and fluids from the food.

I am the mouth, digestion begins with me.
