

Earth's Spheres Interactions

Read each of the clues and decide which spheres (*hydrosphere, geosphere, atmosphere, biosphere*) belong in the space:

1. Water evaporates from the _____ and rises into the _____.
2. The _____ provides oxygen for living organisms and helps regulate temperatures in the _____.
3. Living organisms in the _____ use water from the _____ for drinking, bathing and growing food.
4. The _____ is made up of gases released from the Earth's crust in the _____.
5. Plants and animals in the _____ rely on resources from the Earth's crust such as soil and minerals from the _____.
6. The _____ is responsible for regulating temperatures and providing oxygen for living organisms in the _____.
7. Living organisms from the _____ use water from the _____ for drinking, bathing and growing food.

Earth's Spheres Interactions

ANSWERS:

1. Hydrosphere- atmosphere
2. Atmosphere – biosphere
3. Biosphere – hydrosphere
4. Atmosphere – geosphere
5. Biosphere-geosphere
6. Atmosphere-biosphere
7. Biosphere - hydrosphere
