

Name: _____

Earth and Space Quiz

Read the description below and select the letter beside the word that best describes the description.

1. ___ Large object of matter that moves around (orbit) the sun (star).
A. comet B. eclipse C. galaxy D. planet
2. ___ A ball of ice and rock that orbits the sun.
A. comet B. planet C. constellation D. equinox
3. ___ The shape of the part of the moon that is illuminated or not (when it's in a new phase).
A. phase B. luminous C. crater D. solar system
4. ___ The planets, the moons, meteoroids, and other objects that revolve around the sun.
A. revolution B. rotation C. solar system D. tilt
5. ___ An astronomical event when a moon or planet passes between another planet, moon or a star/sun.
A. orbit B. solstice C. gravity D. eclipse
6. ___ The galaxy that contains our solar system.
A. phase B. asteroid C. milky way D. meteoroid
7. ___ The repeating path an object takes around another object.
A. axis B. star C. tides D. orbit
8. ___ One complete orbit of earth around the sun is called a revolution.
A. solar system B. revolution C. galaxy D. asteroid
9. ___ A large hole in the ground that is shaped like a bowl.
A. comet B. crater C. milky way D. gravity
10. ___ Rise and fall of the ocean (water level) due to the moon's gravity.
A. star B. tides C. crater D. meteoroid

Name: _____

Earth and Space Quiz

Read the description below and select the letter beside the word that best describes the description.

- D Large object of matter that moves around (orbit) the sun (star).
A. comet B. eclipse C. galaxy D. planet
- A A ball of ice and rock that orbits the sun.
A. comet B. planet C. constellation D. equinox
- A The shape of the part of the moon that is illuminated or not (when it's in a new phase).
A. phase B. luminous C. crater D. solar system
- C The planets, the moons, meteoroids, and other objects that revolve around the sun.
A. revolution B. rotation C. solar system D. tilt
- D An astronomical event when a moon or planet passes between another planet, moon or a star/sun.
A. orbit B. solstice C. gravity D. eclipse
- C The galaxy that contains our solar system.
A. phase B. asteroid C. milky way D. meteoroid
- D The repeating path an object takes around another object.
A. axis B. star C. tides D. orbit
- B One complete orbit of earth around the sun is called a revolution.
A. solar system B. revolution C. galaxy D. asteroid
- B A large hole in the ground that is shaped like a bowl.
A. comet B. crater C. milky way D. gravity
- B Rise and fall of the ocean (water level) due to the moon's gravity.
A. star B. tides C. crater D. meteoroid
