

22 the first cell phone was developed in the 1974 by a man named martin cooper. it was invented even befour a cordless phone for home use was developed. hard to imagine it weighed a kilogram and was much larger than cell phones today.

23 the first cell phone went on sale in the united states for \$4000. hard to imagine your tiny liddle phone has more power than the computer that was used when apollo 11 landed on the noon in july of 1969.

24 it's been said that more people in the world have cell phones than toilets. it has been noted that their is 19 times more bacteria on your phone than on a toilet handle. yikes?
