

Name: _____

Groundhog Life Cycle

Label each stage of the groundhog life cycle. Describe the changes at each stage. The life cycle of a baby groundhog from baby to adult is approximately 12 months as they go through the stages of newborn, adolescent, teenager to adult groundhog. Describe the changes at each stage. When a groundhog gives birth, it is a live birth. Groundhogs have up to 3-10 babies.

Newborn, Baby, Young Adult
