

Name: _____

Heredity and Traits

Look at the clues below and determine the word that fits in the cross word puzzle either across or down.

ACROSS

1. This gene shows a specific trait even if just one parent pass the gene to the offspring.
4. Our traits are controlled by these.
5. Traits that are passed along from a parent to an offspring.
8. An example of a trait.
9. Part of the cell that contains our DNA/genetic material

DOWN

2. Animal's young, sons and daughters.
3. This gene shows a specific trait when both parents pass the gene to the offspring.
4. How traits are inherited is the science of this.
6. Instructions that will determine our genetics.
7. Distinguishing characteristics of living things.
