# How Many Illnesses?

1. In 15 minutes without looking this up, make a list of as many types of illnesses you can think of?
2. Prioritize your list from the worst type of illness to the mildest type of illness.
3. For each illness you have identified, explain what the symptoms are and how an individual might recover from the virus.
4. Make a list of every illness you have ever had. Identify how and if any of those illnesses could have been avoided.
