

Life Cycle of a Frog

by _____

<http://worksheetplace.com>©

It takes about 6 to 21 days for the eggs to hatch.

<https://worksheetplace.com>©

The egg hatches, into a tadpole and begins swimming in about 7 days.

In about 9 weeks, the tadpole sprouts arms.

<http://worksheetplace.com>©

By about 12 weeks, the tadpole looks like a frog with a tail.

<http://worksheetplace.com>©

By about 16 weeks, the tadpole looks like a full grown frog.
