

Name: _____

Life Cycle Research Project

1. Select a plant or animal of your choice.
2. Decide on a presentation format: *slides, poster, presentation, essay*.
3. Identify where your plant or animal is located in the world.
4. Identify the number of species for your plant or animal.
5. How long has your plant or animal been in existence?
6. Explain how the life cycle begins with your plant or animal.
7. What does your plant or animal need for survival?
8. What threatens your plant or animal's survival?
9. Explain each stage of the life cycle for your plant or animal and fully describe the changes and identify what the names are for each stage.
10. How long does it take the life cycle from beginning to adult?
11. How long is the typical life span of your animal or plant?
12. Compare and contrast the life cycle of your plant or animal with your own life cycle.
