

# Periscope Investigation

## What is needed:

1. *Empty, clean milk carton or empty paper towel roll.*
2. *2 small mirrors (dollar store) or foil if mirror's can't found.*

## What to do:

Make a periscope as shown in the image. A periscope let's you see around things by using mirrors to reflect light.

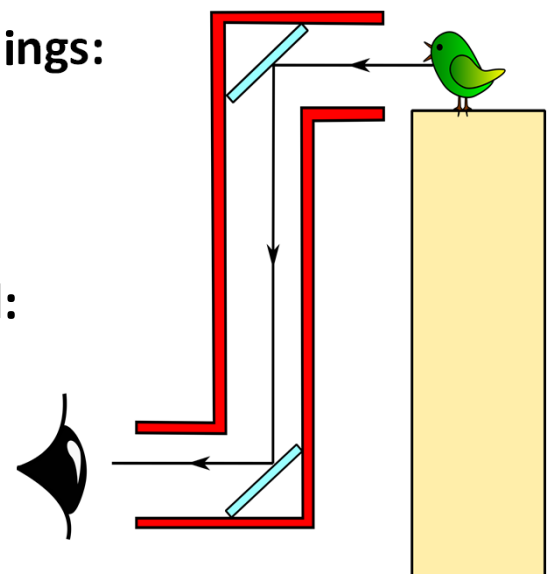

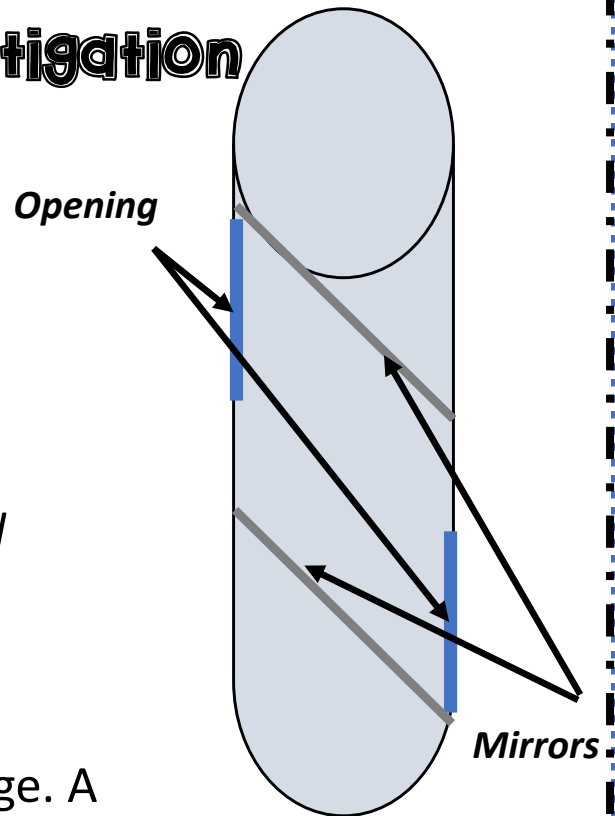

## Predict:

Will you be able to see around the corner with your periscope? Why?

Will your periscope work in the dark? Why or why not.

## Record and report and explain your findings:

## Explain how a periscope could be useful:
