

1

Our Sun

The sun is a big, hot ball of fire in the sky. The sun is yellow and orange. It is also a star.

It is like the stars we see at night. The sun gives us light and heat so we can see and stay warm. It is far away from us.

The sun gives us energy and it helps plants to grow. If we did not have the sun, we could not live.

1. Read the passage about our sun.
2. Underline each word that you could not read.
3. Circle each word that took you more than 1 try.
4. Answer the questions.

1
