Germs

Germs are living things. We can not see germs with our eyes. Germs can make us sick if we touch or breathe them in. Germs are found everywhere.

Germs are on things like door handles, phones and toys. We can wash our hands with soap and water to stop us from getting sick from germs. We can cover our mouth when we cough or sneeze. We need to wash our hands before we eat or after we go to the bathroom. If we do these things, we can keep the germs away.

1. Read the passage about germs.
2. Underline each word that you could not read.
3. Circle each word that took you more than 1 try.
4. Answer the questions.

1
