

Good Manners

Good manners are important because they help us be kind and respectful to others. Saying "please" and "thank you" are examples of good manners. It is also important to share and take turns.

Another example of good manners is using our inside voices when we are inside and being quiet when someone is talking. It is also important to use our manners at the table, like using a napkin and not talking with our mouths full. When we have good manners, we make friends and people will enjoy being around us. Good manners make us feel happy and makes others happy too.

1. Read the passage about good manners
2. Underline each word that you could not read.
3. Circle each word that took you more than 1 try.
4. Answer the questions.
