

Name: _____

Pre Algebra Expressions

Use the known variable to evaluate each expression. Show your work.
(Division, Addition and Parenthesis)

Evaluate each expression when $y = 64$.

1. $(y + 2) \div 66 =$

2. $(y + 18) \div 78 =$

3. $(y + 26) \div 97 =$

4. $59 \div (y + 19) =$

5. $(y + 74) \div 3 =$

6. $11 \div (y + 49) =$

7. $(y + 17) \div 66 =$

8. $77 \div (y + 36) =$

9. $(y + 18) \div 25 =$

10. $62 \div (y + 50) =$

Name:

Pre Algebra Expressions

Use the known variable to evaluate each expression. Show your work.
(Division, Addition and Parenthesis)

Evaluate each expression when $y = 64$.

1. $(y + 2) \div 66 = 1$

2. $(y + 18) \div 78 = 1.1$

3. $(y + 26) \div 97 = 0.9$

4. $59 \div (y + 19) = 0.7$

5. $(y + 74) \div 3 = 46$

6. $11 \div (y + 49) = 0.1$

7. $(y + 17) \div 66 = 1.2$

8. $77 \div (y + 36) = 0.8$

9. $(y + 18) \div 25 = 3.3$

10. $62 \div (y + 50) = 0.5$
