

Name: _____

Subtraction of Fractions

Find Common Denominators and then the difference.

1. $\frac{3}{4} - \frac{5}{8} =$

2. $\frac{5}{6} - \frac{2}{5} =$

3. $\frac{3}{6} - \frac{1}{6} =$

4. $\frac{6}{8} - \frac{1}{4} =$

5. $\frac{2}{6} - \frac{1}{6} =$

6. $\frac{6}{8} - \frac{1}{3} =$

7. $\frac{3}{4} - \frac{2}{3} =$

8. $\frac{1}{4} - \frac{1}{6} =$

9. $\frac{2}{3} - \frac{3}{5} =$

10. $\frac{2}{5} - \frac{1}{6} =$

Name: _____

Subtraction of Fractions

Find Common Denominators and then the difference.

$$1. \quad \frac{3}{4} - \frac{5}{8} = \frac{1}{8}$$

$$2. \quad \frac{5}{6} - \frac{2}{5} = \frac{13}{30}$$

$$3. \quad \frac{3}{6} - \frac{1}{6} = \frac{1}{3}$$

$$4. \quad \frac{6}{8} - \frac{1}{4} = \frac{1}{2}$$

$$5. \quad \frac{2}{6} - \frac{1}{6} = \frac{1}{6}$$

$$6. \quad \frac{6}{8} - \frac{1}{3} = \frac{5}{12}$$

$$7. \quad \frac{3}{4} - \frac{2}{3} = \frac{1}{12}$$

$$8. \quad \frac{1}{4} - \frac{1}{6} = \frac{1}{12}$$

$$9. \quad \frac{2}{3} - \frac{3}{5} = \frac{1}{15}$$

$$10. \quad \frac{2}{5} - \frac{1}{6} = \frac{7}{30}$$
