1. forecast

2. cirrus

3. drought

4. gust

5. cloud

6. fog

7. hail

8. thermometer

9. climate

10. snow

# ANSWERS:

1. cloud—5 A visible mass in the sky containing particles of water/vapor.
2. climate—9 Average temperatures, precipitation and weather conditions over a longer period of time.
3. forecast—1 A prediction about the weather.
4. \_\_\_\_\_ Visible droplets of water near the ground that reduces visibility.  
fog—6
5. \_\_\_\_\_ A weather instrument for measuring temperature.  
thermometer—8
6. \_\_\_\_\_ Extremely dry condition, lack of precipitation.  
drought—3
7. \_\_\_\_\_ Precipitation that turns to ice as it hits the ground.  
hail - 7
8. hail - 7 Precipitation in the form of white frozen ice crystals.
9. snow —10 Rapid increase in wind speed.
10. \_\_\_\_\_ Wispy cloud formations that are very high.  
gust—4

1. forecast

2. cirrus

3. drought

4. gust

5. cloud

6. fog

7. hail

8. thermometer

9. climate

10. snow
