Division Name $\qquad$

1. Divide the 8 squares into groups of 2. How many groups $\qquad$ $\square \square \square \square \square \square \square \square$ $8 \div 2=$
2. Divide the 4 squares into groups 2. How many groups $\qquad$ $4 \div 2=$
3. Divide the 6 squares into groups 3. How many groups $\qquad$

$$
6 \div 3=
$$

4. Divide the 10 squares into groups 5. How many groups $\qquad$ $\square \square \square \square \square \square \square \square \square \square \quad 10 \div 5=$
5. Divide the 2 squares into groups of 1. How many groups $\qquad$
$\square$ $2 \div 1=$
6. Divide the 10 squares into groups 2. How many groups $\qquad$ $\square \square \square \square \square \square \square \square \square \square 10 \div 2=$
7. Divide the 12 squares into groups 4. How many groups $\qquad$
$\square \square \square \square \square \square \square \square \square \square \square \square 12 \div 4=$
8. Divide the 12 squares into groups 6. How many groups $\qquad$
$\square \square \square \square \square \square \square \square \square \square \square \square 12 \div 6=$
